MULTI MISSION

Complete challenging objectives while helping Samus to collect Artifacts. Collect enough Artifacts to open new tables. Face off against tough enemies and vicious bosses. Defeated bosses will then be available for the Single Mission.

SINGLE MISSION

Focus on one table in order to achieve the high score. There are two default tables that you begin with. Additional tables will become available once you open them up in Multi Mission.

WIRELESS MISSION

Connect up to seven other players simultaneously. Everyone competes on the same table, Magmoor Caverns, trying to be the first to reach the target score. See page 18 for more details on connecting and playing wirelessly.

SELECTING A TABLE

Once you have selected a mission, you must now determine the starting table.

SELECTING A DESTINATION

Use the Up and Down Direction Pad to select a table. Press A to confirm the selection and travel to the destination.

OPENING NEW TABLES

In order to gain access to new tables you must play the Multi Mission mode. By playing through the Pirate Frigate or Tallon Overworld it will give you access to the Phazon Mines and Phendrana Drifts tables. Collect Artifacts along the way in order to progress even farther.

Collecting 12 Artifacts allows access to the Artifact Temple. Completing the Artifact Temple will open the path to the ultimate pinball challenge where Samus faces her greatest threat.

HUD

The screen will give you all the information you need in order to defeat the enemies and take Samus across the varied terrains of the tables.

When this is lit, you have a Power Bomb to use.

This is the total score you have achieved.

These bars represent Samus' health. Once her health is gone, if you take damage, the ball will explode.

The lighted missile icons tell you how many missiles you have left.

Number of extra balls left.

These lighted icons tell you how many bombs you have.

POWER UPS

Along the way Samus will be able to collect weapons and power-ups in order to achieve the best scores and open up more tables.

POWER-UPS

	
Missile – These allow Samus to unleash a powerful attack while in Combat Mode	Power Bomb – Use these to damage a large area

PICK-UPS

					
Health – Restores 2 Health Boxes	Missile – Restores 1 Missile	Power Bomb – you can only hold one at a time, so use it before trying to pick up another	Artifact – collect 12 to gain access to the Artifact Temple in Multi Mission	Special – Once you have collected all the Artifacts, Special will become available to increase your score	Extra Ball – Adds an extra ball to your counter

SCORING

BOUNTY BONUS

When you lose a ball, you will be awarded a Bounty Bonus. This is based on the following:

- Total number of each enemy type killed
- Total number of specials collected
- Bounty Multiplier (See Board Features Pg 12 for more details)

Note that the total number is the total from the entire game, not just that ball. Therefore they will continue to accumulate and become worth more on subsequent balls.

HIGH SCORES LIST

There are several high score lists that will save your accomplishments.

The main High Score list (top 10 scores are listed) is for Multi Mission. The number next to the artifact symbol tells you how many artifacts you have collected (maximum 12). This number will reset to zero once you have defeated the final boss. The number on the artifact symbol tells you how many times you have defeated the final boss. If the final boss has not yet been defeated, no number will be present on the artifact symbol.

The two tables for the Single Mission will list the top five scores, and the total number of Specials collected.

Opening up tables in Multi Mission will allow you to use those tables in Single Mission. They are played in a Time Attack Mode, where your goal is to complete the table in the shortest amount of time. The top five times are listed.

BOARD FEATURES

Each table has it's own unique features but there are some common ones shared between most tables.

- 1 Mode Saucer** - Shoot this saucer to start whichever mode is being indicated by the hologram.
- 2 S-A-M-U-S lights** - Shoot the flashing Blue Ramps to light a letter. Light all the letters to open the Combat Saucer.
- 3 Combat Saucer** - Shoot the ball into this when it is open to start Combat Mode. Samus can be hit 4 times before being forced back into Morph Ball mode. Use your blaster or missiles to kill all the enemies and to successfully complete the mini-game and return to Morph Ball mode.
- 4 Bounty Multiplier Rollovers** - Light all of these to increase the Bounty Multiplier
- 5 Kickbacks** - These prevent the ball from passing into the outlanes (the lanes just outside the flippers), but retract once they have been used. These can be re-activated by using the Award Scanner.
- 6 Force Field** - This prevents you from losing the ball between the flippers. It can be re-energized by using the Award Scanner.

- 7 Award Scanner** - Shooting yourself into this scanner will cause several possible rewards to spin. Use a bomb to stop the wheel and earn the reward.

Health Recharge - Restores Samus' health to maximum

Big Points - Awards points

Phazon Multiball - Starts a Phazon Multiball

Combat Ready - Opens the Combat Saucer

Extra Ball - Awards an additional ball for the mission
